Name: SUN RUI

Student ID: 18083229g

Ans1:

a)

$$\begin{aligned} & \mathsf{Dissim}(0001,\,0150) = 1 - \frac{|\{\mathsf{Romance},\mathsf{Drama}\}|}{|\{\mathsf{Drama},\mathsf{Romance},\mathsf{Sci-Fiction},\mathsf{Mystery},\mathsf{Fiction}\}|} = \frac{3}{5} = 0.6 \\ & \mathsf{Dissim}(0001,\,0553) = 1 - \frac{|\{\mathsf{Sci-Fiction}\}|}{|\{\mathsf{Romance},\mathsf{Sci-Fiction},\mathsf{Drama},\mathsf{Mystery},\mathsf{Action},\mathsf{Thriller},\mathsf{Horror}\}|} = \frac{6}{7} \approx 0.857 \\ & \mathsf{Dissim}(0001,\,1011) = 1 - \frac{|\{\mathsf{NULL}\}|}{|\{\mathsf{Romance},\mathsf{Sci-Fiction},\mathsf{Drama},\mathsf{Mystery},\mathsf{Horror},\mathsf{Thriller},\mathsf{Horror}\}|} = 1 \\ & \mathsf{Dissim}(0001,\,3997) = 1 - \frac{|\{\mathsf{Sci-Fiction}\}|}{|\{\mathsf{Romance},\mathsf{Sci-Fiction},\mathsf{Drama},\mathsf{Mystery},\mathsf{Action},\mathsf{Crime}\}|} = \frac{5}{6} \approx 0.833 \\ & \mathsf{Dissim}(0150,\,0553) = 1 - \frac{|\{\mathsf{NULL}\}|}{|\{\mathsf{Drama},\mathsf{Romance},\mathsf{Fiction},\mathsf{Action},\mathsf{Sci-Fiction},\mathsf{Thriller},\mathsf{Horror}\}|} = 1 \\ & \mathsf{Dissim}(0150,\,1011) = 1 - \frac{|\{\mathsf{NULL}\}|}{|\{\mathsf{Drama},\mathsf{Romance},\mathsf{Fiction},\mathsf{Action},\mathsf{Crime},\mathsf{Sci-Fiction}\}|} = 1 \\ & \mathsf{Dissim}(050,\,3997) = 1 - \frac{|\{\mathsf{NULL}\}|}{|\{\mathsf{Action},\mathsf{Sci-Fiction},\mathsf{Thriller},\mathsf{Horror}\}|} = \frac{2}{4} = 0.5 \\ & \mathsf{Dissim}(0553,\,3997) = 1 - \frac{|\{\mathsf{Action},\mathsf{Sci-Fiction},\mathsf{Thriller},\mathsf{Horror},\mathsf{Crime}\}|}{|\{\mathsf{Action},\mathsf{Sci-Fiction},\mathsf{Thriller},\mathsf{Horror},\mathsf{Crime}\}|} = \frac{3}{5} = 0.6 \\ & \mathsf{Dissim}(1011,\,3997) = 1 - \frac{|\{\mathsf{NULL}\}|}{|\{\mathsf{Action},\mathsf{Sci-Fiction},\mathsf{Thriller},\mathsf{Horror},\mathsf{Crime}\}|} = 1 \end{aligned}$$

dissimilarity matrix:

| | 0001 | 0150 | 0553 | 1011 | 3997 |
|------|-------|------|------|------|------|
| 0001 | 0 | ı | ı | ī | - |
| 0150 | 0.6 | 0 | - | - | - |
| 0553 | 0.857 | 1 | 0 | - | - |
| 1011 | 1 | 1 | 0.5 | 0 | - |
| 3997 | 0.833 | 1 | 0.6 | 1 | 0 |

b)

merge 0553 and 1011 (0.5), we have:

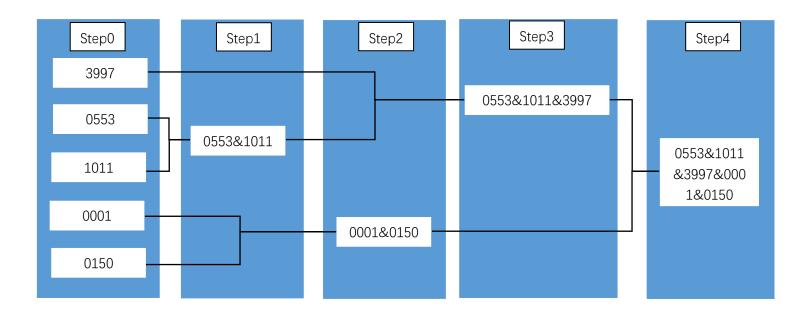

| | (// | | | |
|-----------|-----------|-------|------|------|
| | 0553&1011 | 0001 | 0150 | 3997 |
| 0553&1011 | 0 | - | - | - |
| 0001 | 1 | 0 | - | - |
| 0150 | 1 | 0.6 | 0 | - |
| 3997 | 1 | 0.833 | 1 | 0 |

merge 0001 and 0150 (0.6), we have:

| | 0553&1011 | 0001&0150 | 3997 |
|-----------|-----------|-----------|------|
| 0553&1011 | 0 | - | - |
| 0001&0150 | 1 | 0 | - |
| 3997 | 1 | 1 | 0 |

merge 0553&1011 and 3997 (0.6), we have:

| | 0001&0150 | 0553&1011&3997 |
|----------------|-----------|----------------|
| 0001&0150 | 0 | - |
| 0553&1011&3997 | 1 | 0 |

c)

Firstly, store all dissimilarities in a list, each dissimilarity stands for a pair of items; Secondly, sort the list by ASC;

Thirdly, travel the ascending list:

If the pair has not existed in any clusters, then the pair is a new cluster;

If both of two items of a pair have been included in different two clusters, then combine these two clusters;

If both of two items of a pair have been included in a same cluster, do noting;

If one item of a pair has existed in a cluster, but another one is not in any clusters, then put it into the cluster.

Let us can see a demo by Python:

The result is same as above result, it can reduce Space Complexity and do not need to update distances between two items.

The code reference:

```
ITEM_NUM = 5
def search_cluster(item, clusters):
   for cluster_index in range(len(clusters)):
    if item in clusters[cluster_index]:
           return cluster_index
    return -1
dissimilarity = {("0001", "0150"): 0.6, ("0001", "0553"): 0.857, ("0001", "1011"): 1, ("0001", "3997"):
0.833, ("0150",
                 "0553"): 1,
               ("0150", "1011"): 1, ("0150", "3997"): 1, ("0553", "1011"): 0.5, ("0553", "3997"): 0.6,
("1011", "3997"):1}
dissimilarity_asc = sorted(dissimilarity.items(), key=lambda item: item[1])
print(dissimilarity_asc)
print("*"*100)
clusters = []
for each pair, distance in dissimilarity asc:
    cluster_position1 = search_cluster(each_pair[0], clusters)
   cluster_position2 = search_cluster(each_pair[1], clusters)
   if cluster_position1 != -1 and cluster_position2 != -1:
       if cluster_position1 != cluster_position2:
           clusters[cluster position1] = clusters[cluster position1] + clusters[cluster position2]
           clusters.pop(cluster_position2)
       print(clusters)
   elif cluster position1 == -1 and cluster position2 != -1:
       clusters[cluster_position2].append(each_pair[0])
       print(clusters)
    elif cluster_position1 != -1 and cluster_position2 == -1:
       clusters[cluster_position1].append(each_pair[1])
       print(clusters)
   else:
       clusters.append(list(each_pair))
       print(clusters)
   if len(clusters[0]) == ITEM_NUM:
       break
```

Ans2

a)

| | P1 | P2 | P3 | P4 | P5 | P6 | P7 | P8 |
|----|------|------|------|------|------|------|------|----|
| P1 | 0 | | | | | | | |
| P2 | 4 | 0 | | | | | | |
| Р3 | 8.49 | 6.32 | 0 | | | | | |
| P4 | 3.61 | 3.61 | 5 | 0 | | | | |
| P5 | 7.81 | 5.39 | 1 | 4.47 | 0 | | | |
| P6 | 7.21 | 4.47 | 2 | 4.12 | 1 | 0 | | |
| P7 | 8.06 | 4.12 | 7.28 | 7.21 | 6.32 | 5.39 | 0 | |
| P8 | 2.24 | 3.61 | 6.40 | 1.41 | 5.83 | 5.39 | 7.62 | 0 |

b)

initial centroids:

| | Group 1 | Group 2 | Group 3 |
|--------------|---------|---------|---------|
| Record | P1 | P4 | P7 |
| Cluster Mean | (2,10) | (5,8) | (1,2) |

Calculate distances to cluster mean:

| | Group 1 | Group 2 | Group 3 |
|----|----------------|----------------|----------------|
| | Distance to P1 | Distance to P4 | Distance to P7 |
| P1 | 0 | - | - |
| P2 | 4 | 3.61 | 4.12 |
| P3 | 8.49 | 5 | 7.28 |
| P4 | - | 0 | - |
| P5 | 7.81 | 4.47 | 6.32 |
| P6 | 7.21 | 4.12 | 5.39 |
| P7 | - | - | 0 |
| P8 | 2.24 | 1.41 | 7.62 |

New centroids:

| | Group 1 | Group 2 | Group 3 |
|--------------|---------|----------------------------------|---------|
| Record | P1 | Mean of (P2, P3, P4, P5, P6, P8) | P7 |
| Cluster Mean | (2, 10) | (5.33, 5.833) | (1, 2) |

i) the new cluster: C1={P1}, C2={P2, P3, P4, P5, P6, P8}, C3={P7}

ii) The centroids of the new clusters: (2, 10) of C1, (5.33, 5.833) of C2, (1, 2) of C3

Ans3

a)

P(Activist)=2/6, P(Follower)=2/6, P(Superstar)=2/6

| A1 | | |
|----------------------|----------------------|-----------------------|
| P(Many Activist)=1/2 | P(Many Follower)=0/2 | P(Many Superstar)=2/2 |
| P(Few Activist)=1/2 | P(Few Follower)=2/2 | P(Few Superstar)=0/2 |
| A2 | | |
| P(Many Activist)=1/2 | P(Many Follower)=2/2 | P(Many Superstar)=1/2 |
| P(Few Activist)=1/2 | P(Few Follower)=0/2 | P(Few Superstar)=1/2 |
| A3 | | |
| P(High Activist)=1/2 | P(High Follower)=2/2 | P(High Superstar)=0/2 |
| P(Low Activist)=1/2 | P(Low Follower)=0/2 | P(Low Superstar)=2/2 |

| | P(X)P(Activist)=0.042 | Target: Activist | |
|---|-----------------------------|--------------------|--|
| A | P(X)P(Follower)=Follower:0 | Predict: Superstar | |
| | P(X)P(Superstar)=0.167 | Tredict. daperstar | |
| | P(X)P(Activist)=0.042 | Target: Activist | |
| В | P(X)P(Follower)=0.333 | Predict: Follower | |
| | P(X)P(Superstar)=0 | Tredict. Follower | |
| | P(X)P(Activist)=0.042 | Target: Follower | |
| С | P(X)P(Follower)=0.333 | Predict: Follower | |
| | P(X)P(Superstar)=0 | redict. Follower | |
| | P(X)P(Activist)=0.042 | Target: Superstar | |
| D | P(X)P(Follower)=0 | Predict: Superstar | |
| | P(X)P(Superstar)=0.167 | redict. Superstar | |
| | P(X)P(Activist)=0.042 | Target: Superstar | |
| E | P(X)P(Follower)=0 | Predict: Superstar | |
| | P(X)P(Superstar)=0.167 | redict. Superstar | |
| | P(X)P(Activist)=0.042 | Target: Follower | |
| F | P(X)P(Follower)=0.333 | Predict: Follower | |
| | P(X)P(Superstar)=0 | redict. Follower | |

So, the classification rate is 4/6

b)

| G | Activist | 1/2*1/2*P(A3 Activist)*2/6=1/12*P(A3 Activist) | A3=High | 1/24 |
|---|-----------|---|---------|------|
| | | | A3=Low | 1/24 |
| | Follower | 0*0*P(A3 Follower)*2/6=0*P(A3 Follower) | A3=High | 0 |
| | | | A3=Low | 0 |
| | Superstar | 2/2*1/2*P(A3 Superstar)*2/6=1/6*P(A3 Superstar) | A3=High | 0 |
| | | | A3=Low | 1/6 |
| | | | | |

| Н | Activist | P(A1 Activist)*1/2*1/2*2/6=1/12*P(A1 Activist) | A1=Many | 1/24 |
|---|-----------|--|---------|------|
| | | | A1=Few | 1/24 |
| | Follower | P(A1 Follower)*2/2*2/2*2/6=1/3*P(A1 Follower) | A1=Many | 1/6 |
| | | | A1=Few | 1/6 |
| | Superstar | P(A1 Superstar)*1/2*0*2/6=0*P(A1 Superstar) | A1=Many | 0 |
| | | | A1=Few | 0 |

According to above table:

User G can be classified to Superstar with the largest probability 1/6 as A3=Low.

User H can be classified to Follower with the largest probability 1/6 as A1= Many or Few.
